

**HI-TECH**  
TECHNOLOGIES & SYSTEMS

**A Automation Alchemist**

**HI-TECH** Technologies & Systems is Dynamic & Most Respected Engineering Firm in India. **HI-TECH** is basically Provides Repair & Maintenance Services for Industrial Automation Products such as PLCs, DCS, CNC, AC/DC Drives & Other Processor Control Instruments.

**HI-TECH** has more sophisticated equipment and more scalability than the next repair provider. Our Diagnosis Pinpoint Systems are the latest universal in-circuit test equipment available. When coupled with proprietary serial PCB testing techniques and surface-mount handling equipment, **HI-TECH** can repair even the most advanced microprocessor or digital signal processor circuits. Our highly trained technicians are certified in ESD and IPC repair and rework standards and routinely detect stressed components that others miss. Plus, after the repair is completed, your printed circuit board is functionality tested to ensure performance.

**Method of PCB Repairs;**

Quality repairs are the top priority at **HI-TECH** and we stand behind our work with a rock solid warranty.

Most service companies do not perform "component level repairs" on damaged circuit boards. They plug-and-play and do the R & D kind of job using circuit boards as fuses and that is NOT the way to solve a problem. At **HI-TECH**, we do extensive component level repairs without replacing faulty components & solder traces we check & test the ICs, EPROMs, PALs, GALs, surface mounted components and more. It is simulates appropriate to a device, measures its corresponding output response and declares whether it is functionally good or bad.

Single sided and double sided boards are serviced in our advanced repair facilities. Most conformal coating can be removed and re-applied when the repair is finished.

**Mission & Object:**

- Total Maintenance Solution
- Reliable & Quality Repair
- Shortest Time
- Lowest Prices
- Warranty Support
- Onsite Support
- 100% Customer Satisfaction

### Obsolete Industrial Automation Spares :

We Sourcing & Supply the Obsolete/Older generation Spares for Industrial Automation Products with 12 Months Warranty. We are providing spares for DCS , PLC, AC/DC Drives & Other Process Control Instruments. We have large Inventory of mainly Siemens make S5/S7 PLC Series.

Even we provide MCCB, Contactors, Relay, IPM and IGBT Modules, all types of Encoders, Scales, Sensors, Transmitters & Electronic Components & Many More...

### Save Money

Buying refurbished products means substantial savings over the cost of buying new and most items are dispatched from stock within 24 hours. Don't retrofit let us supply and source all the spares you need.

### Testing & Warranty

All of our Obsolete and surplus stock spares are 100% fully tested (subject to part supplied and test rig availability) and are covered by our comprehensive 12-month warranty.

### Sourcing

If you are unable to find the item on our site we can still help. Our dedicated global sourcing team can source any item you may require, including old and obsolete spares. So whatever you require please contact us today for a quotation.
