Product Name 1: FV5 Series Servos

Image: (upto 1MB)

Description: (only 50 words) *FV5 series high-performance servo products are aimed at precision manufacturing, providing customers with high-performance motion control solutions with high dynamic response and precise positioning.*

Product Name 2: HMIs

Image: (upto 1MB)

Description: (only 50 words): *Adopts a high-definition, high-brightness, full-view screen, carefully selected high-performance CPU, with large-capacity storage, comprehensively improving overall performance. Featuring a miniaturized IoT module for increased discretion and convenience in IoT installations.*

Product Name 3: F5 & FL8 Series PLCs

Image: (upto 1MB)

Description: (only 50 words): Flexem Smart PLC can connect to the Internet via Ethernet, 4G, Wi-Fi, etc. Compliant with IEC61131-3 international standards, Codesys development platform. Integrated PLC/motion control platform, a single controller can achieve complex processes. EtherCAT high-speed motion control bus, with a minimum communication cycle of 1ms, efficient and fast.
